DETAILED ACTION

Continued Examination Under 37 CFR 1.114

1. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on December 10, 2007 has been entered.

Response to Remarks

2. The Office Action has been made issued in response to amendment filed December 10, 2007. Claims 1-33 are pending.

Allowance

The following is an examiner's statement of reasons for allowance: The most pertinent prior art is Krause et al (US Patent No.: 6,701,174) and Clough (US Patent No.: 5,977,979). Krause discloses a computer-implemented method of planning orthopaedic comprising: providing a library of templates representing orthopaedic prostheses; displaying a patient image showing anatomical features that are relevant for the orthopedics surgery being planned; displaying over the patient image a geometrical construct comprising a plurality of interrelated shapes and lines defined by a plurality of

interrelated geometric parameters corresponding to parameters describing the orthopaedic prostheses represented by the templates in the library; allowing a user to reconfigure the geometrical construct by adjusting the geometric parameters according to the anatomical features of the underlying patient image so as to specify a mapping of bone structure shown in the patient image. However, Krause does not expressly disclose scaling the patient image according to user input. Clough discloses a 3D simulation method that includes scaling the patient image according to user input. However, neither Krause or Clough specifically disclose automatically selecting at least one template from the library in accordance with the geometric parameters adjusted by the user. The examiner finds no reason or motivation to combine the above references in an obvious rejection thus placing the application in condition for allowance.

3. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

4. Claims 1-33 are allowed.

Conclusion

The prior art made part of the record and not relied upon is considered pertinent to applicant's disclosure.

Powell (US Patent No.: 6,424,332) is cited to teach an image comparison apparatus and method.

Lelong, Pierre (US Patent No.: 6,190,320) is cited to teach a method for computer assisted surgery

Tanaka et al (US Patent No.: 7,039,225) is cited to teach a method for artificial bone template selection.
